CV460AV Adhesive Vinyl

CV460AV is a micro-porous coated 4 mil monomeric vinyl with self-adhesive and 120 gsm double PE coated release liner. Compatible with dye and pigment aqueous inks although pigments are recommended to resist fading. Water resistant after drying. Works on all popular brands of aqueous wide format inkjet printers. Can be laminated with pressure sensitive and thermally activated films. For use in a wide variety of print-and-mount applications for point of purchase, displays, and signage.
