CV770MF HD Polypro Banner Matte

CV770MF is a high density polypropylene film with fast drying micro-porous coating in a matte finish. The high density polymer provides a stiffer feel and improved lay-flat characteristics. The coating is designed to produce soft color gradients with high resolution and sharpness. Compatible with dye and pigment aqueous inks although pigments are recommended to resist fading. Water resistant after drying. Works on all popular brands of aqueous wide format inkjet printers. Can be laminated with pressure sensitive and thermally activated films. For use as indoor posters and point-of-sale displays.

White Point	97.0 2.0 -7.5	CIE L*a*b* D50/2°
Gloss/Finish	3	Matte
Weight	245 gsm	+/- 5
Thickness	8 mil	
Opacity	84%	
Durability	6 months	Indoors
Standard Widths	36", 42", 50", 60" (100' and 200' lengths on 2" core)	
Compatibility	Aqueous inkjet, dye and pigment
