CV775AG Self Adhesive HD Polypro Banner Gloss

CV775AG is an adhesive back high density polypropylene film with a peel off liner. It has a fast drying micro-porous coating in a gloss finish. The high density polymer provides a stiffer feel and improved lay-flat characteristics. The coating is designed to produce soft color gradients with high resolution and sharpness. Compatible with dye and pigment aqueous inks although pigments are recommended to resist fading. Water resistant after drying. Works on all popular brands of aqueous wide format inkjet printers. Print and mount on foam core, cor-o-plast and wide range of rigid substrates. Laminate where endurance is needed.

White Point	97.0 2.0 -7.5	CIE L*a*b* D50/2°
Gloss/Finish	Gloss	
Weight	245 gsm	+/- 5
Thickness	8 mil	
Opacity	84%	
Durability	6 months	Indoors
Standard Widths	24", 36", 42", 50", 60" (100' length on 2" core)	
Compatibility	Aqueous inkjet, dye and pigment
